PRESENTATION

Luxor Group

Luxor is a privately held single-family office providing equity and related capital to purpose-driven people and businesses. Since its inception as a hotel company in Rio de Janeiro in 1917, Luxor activities include business operations, long-term investments and philanthropic activities. Continuous improvement, simplicity, ethics and longevity are the core pillars of our success.

Luxor Lipizzaner

Luxor Lipizzaner is an investment fund started in 2007 with the goal of creating wealth over the long-term, a global mandate and focus on investing in companies. Our investment strategy consists in building a core portfolio of 10 to 15 companies and combine that with bonds or alternative investments to improve the risk profile of the fund. We base our investment process on a fundamentalist approach where we combine a bottom-up analysis with our assessment of the macro environment. We strive to deliver great returns over the long term, relying on our discipline, commitment, business expertise, complementary set of skills, and passion for investing.

The Luxor Lipizzaner fund had a return target defined in Brazilian Reais until December 2022. Since January 2023, the fund is managed with a return target in US Dollars.

Our Purpose

“ We believe in thinking differently and challenging the status quo - our approach is to invest with the purpose of creating wealth, ensuring that our incentives are fully aligned with those of our investors. We focus on the long-term, we rely on our experience and analytical depth, and we strive to make it simple. ”

Our Purpose

EXPERTISE

Investing is not easy. It involves risks of all sorts, complex financial concepts, erratic markets and an endless menu of products that favor the issuer but not the buyer. We have a team of highly skilled and trained professionals working hard to understand all that and build a portfolio that offers our investors the best expected return possible, minimizing the risk of permanent capital losses.

INCENTIVES AND COSTS

Most of the liquid capital of the group is invested through the fund and subject to the same fees that apply to all investors. Thus, the alignment of incentives is complete. Furthermore, we chose not to have an annual performance fee and compensate the portfolio managers exclusively for their long-term performance, to align their incentives with the investment horizon of the group.

LONG-TERM FOCUS

We believe that anticipating short-term market moves is an unrealistic proposition. Therefore, investing is only done properly with a long-term oriented approach. At Luxor, we are fully committed to the success of the fund in the long-term. This focus is only possible given the commitment of our investors and it is an asset that we will profit from over time.

SIMPLE IS BEST

Our practice is to build a balanced and simple portfolio and let returns compound over time. We avoid overreacting to short-term price movements or incurring in complex derivatives to enhance profitability or avoid losses but we manage risk carefully combining assets that together will perform well in most circumstances.

Our Philosophy

FUNDAMENTALIST APPROACH

We intend to profit from evaluating the intrinsic value of the assets, based on a diligent analysis of the business fundamentals, its competitive advantages and the secular trends that underpin its growth outlook.

FOCUS ON INVESTING IN COMPANIES

Companies are the best source of returns for long-term investors. A well-built portfolio of solid businesses gives our best risk/reward investment opportunity. We also invest in fixed income or alternative products to manage our beta risk and take advantage of market sell-offs.

DILIGENT ANALYSIS

We rely on a diligent, theoretically rigorous and fact-based analytical process in all steps of our investment process composed by our asset allocation, our stock-picking, our market-timing and our risk management.

RISK MANAGEMENT

Managing risks is an important part of our investment process. We design our portfolio to minimize the odds of permanent capital losses using asset-class diversification, concentration limits and a general evaluation of the risk profile of our portfolio.

Core Approach

**ASSET
ALLOCATION**

The fund will invest mostly in businesses in public and private markets – it will always carry at least 60% of exposure in equities, but it will invest in other asset classes as well.

**SECURITY
SELECTION**

We pick assets with the best risk/return possible based on our fundamentalist approach and our investment philosophy.

**PORTFOLIO
ANALYSIS**

We use diversification and our qualitative risk assessment to enhance the risk/reward profile of our investments.

**MARKET
TIMING**

The fund will take advantage of our long-term horizon to acquire businesses at cheap valuations when these opportunities show up.

**INVESTMENT
COMMITTEE**

The investment committee will provide guidance and support to the portfolio manager. Also, it will be responsible for monitoring the risks embedded in the portfolio and enforcing its alignment to the Luxor Group's values.
